

NOW YOUR WINEDIRECT ACCOUNT CAN CONNECT TO QUICKBOOKS™

WITH **WGITS QB**, YOU CAN AUTOMATICALLY TRANSFER TRANSACTIONS FROM **WINEDIRECT** INTO **QUICKBOOKS**.

What is WGits QB?

WGits QB is a software that uses WineDirect's advanced API to pull data directly from your WineDirect account into your QuickBooks desktop application. No more manually downloading reports and using Transaction Pro Importer™ (TPI) each time you want to upload WineDirect transactions.

Stress Free Order Management

- WGits QB is set up once, and then every night, week, or month (your choice) it automatically uploads all new orders.
- Orders that have issues are sent back to you in a report so you can research and deal with them when you have time.
- WGits QB has **SKU Assist** synchronization that will automatically check that SKUs are matching in both systems.
- WGits QB does not rely on WineDirect's reports. Now, any updates pushed from WineDirect won't affect your ability to transfer orders to QuickBooks.

We've Got You Covered

- No hassle setup: WineGlass Marketing handles the complete set up and guarantees it will work before we say "it's done".
- Unlimited support: Unlike TPI that has no support, WGits QB comes with complete phone, email, and chat support by WineGlass Marketing.
- We service the software and ensure it is up-to-date and working with WineDirect.

WGits QB Will Save You Money

TPI requires you to manually run and download reports, fix errors on the spot, and then upload them to QuickBooks. This can take between 2-8 hours a month! WGits QB does all this behind the scenes to free up your book keeper or accounting team. WGits QB is offered at a low cost, predictable, monthly fee with no hidden costs for support.

TPI Features vs WGits Features
